As the dissemination of information takes on many new levels of technology and continues to evolve, the American College of Physicians (ACP) has again compiled a “Library” of reference materials to aid the internist in his or her quest to maintain a satisfactory level of medical knowledge. Although some materials may remain the same, new information sources are constantly becoming available, and Informatics has virtually exploded with the rapidly evolving computer technology that surrounds us in our professional environments. Students and librarians are likewise confronted with an unrelenting deluge of medical information, and we hope this list of publications and educational programs will assist them as well.
Recommendations and Considerations Related to Preparticipation Screening for Cardiovascular Abnormalities in Competitive Athletes: 2007 Update: A Scientific Statement From the American Heart Association Council on Nutrition, Physical Activity, and Metabolism: Endorsed by the American College of Cardiology.
